Dear Kansas Gas Service Customer,

Please be advised that Kansas Gas Service has contracted NPL Construction to replace the gas mains/and or service lines in your neighborhood. This is being done in order to improve the safety of your service and reduce the likelihood of possible outages.

During the replacement of these mains and service lines your service may be interrupted. This is a necessary step in completing the new installation and we apologize for the inconvenience. If an interruption is likely, NPL will contact you in advance to inform you of the pending outage and schedule the relighting of your gas appliances.

At some point in time, a camera technician may require entry to your home in order to survey your sewer lines. This is done to ensure the quality of the installation and confirm that there was no damage rendered to your sewer line. We kindly request that you accommodate our technician in performing this task.

We are honored to have been entrusted with this work and look forward to serving your community. If you have any questions or concerns, please contact us at your earliest convenience and we will gladly assist you.

**NPL will not be responsible for damage to sprinkler lines/ Dog fences. Please have all lines marked prior to our work beginning.**

Sincerely,

Stan "Red" Wunder  
Superintendent
